Acknowledgments
The *2023 Alaska Child Care Market Price Survey Report* was prepared by the Institute of Social and Economic Research (ISER), University of Alaska Anchorage (UAA) under contract with the Child Care Program Office (CCPO) Division of Public Assistance, Department of Health and Social Services. We would like to acknowledge all the efforts that went into conducting this survey and preparing the final report.

We thank:

- Christina Hulquist, Child Care Program Office (CCPO) Lead Administrator
- Ambra Mavis, Program Coordinator II, DPA-Child Care Assistance, CCPO
- Ronda Buckingham, Public Assistance Analyst II, CCPO
- Mary Kopriva, Former Assistant Professor, ISER/UAA

For their support in this endeavor. We also thank the Child Care Assistance Program Designees and thread, Alaska's Child Care Resource and Referral Network, for their outreach support.

We are grateful to the licensed child care providers of Alaska for their willingness in taking the time to participate in the survey and providing valuable data for this study. Our appreciation also goes to all who reviewed the report, for their time and feedback.

Executive Summary

Purpose

The Family Support Act of 1988 mandates that child care assistance rates be driven by market prices. The Child Care and Development Block Grant Act of November 2014 currently requires states to survey their child care markets at least every three years, and no more than two years prior to submitting their Child Care and Development Fund (CCDF) Plan to the federal Administration for Children & Families, Office of Child Care. States are required by the federal government to set their state subsidy rates (state rates) for child care providers at the 75th percentile of current market prices, which is designed to give families receiving child care assistance access to 75% of the providers in their community.

A market price survey collects current provider prices for child care and qualitative information to evaluate states' child care assistance subsidy rates and to better understand states' child care markets. The primary purpose of conducting a market price survey is to help ensure that state rates for child care assistance are high enough so families receiving child care assistance have equal access to affordable child care as families who do not receive child care assistance.

The 2023 Alaska Child Care Market Price Survey Report will be included in Alaska's CCDF Plan for Federal Fiscal Year (FFY) 2025-2027 and used to revise Alaska's Child Care Assistance Program (CCAP) state subsidy rates (state rates).

Child Care Provider Information Rates and Costs

- *What did we learn about child care providers in Alaska?*
- *What type of businesses and facilities participate in the child care assistance program?*
- *What is their capacity, enrollment, and waitlist status?*

Respondents to the survey (n = 247) consisted of a roughly equal mix of Licensed Homes (45%) and Licensed Centers (46%) spread across each of seven geographic regions. Responding providers have a licensed capacity of 36 children on average and non-responding providers have a licensed capacity of 43 children on average. The sample of responding providers is slightly weighted toward home providers: 46% of providers were centers and 54% of non-responding providers were centers.

Just under half (44%) of child care providers are Sole Proprietors with the next largest portion Non-Profit Organizations (23%).

The vast majority of responding providers (85%) are participating in the Child Care Assistance Program (CCAP). Among the 15% of responding providers indicating they are not current participants in the CCAP, the majority (75%) provided reasons other than those listed in the survey for not participating in CCAP.

About two-thirds (67%) of responding providers say they are not operating at full capacity (see Figure 8). Among the provides reporting not operating at their licensed capacity, the lack of qualified child care associates (46.5%) and other qualified child care staff (59.2%) were the most cited reasons. In addition, 35.7% of below-capacity providers indicated that not enough families were interested in child care (see Table 120).

Responding providers represented total full-time monthly enrollment of 4,546 children. These providers reported having a waitlist of 4,342 children. By age, infants have the longest waitlist

relative to total full-time monthly enrollment, approximately 2.9 children waiting for every 1 enrolled, while only 1 school-age child was on a waitlist for every 2.3 enrolled full-time monthly.

- *How do provider's set prices?*
- *What are child care provider prices?*
- *What are the additional fees and are there fees reductions?*
- *What types of care are provided in additional to the standard?*

Over half (51%) of providers use the "actual cost of providing care" when setting their rates compared to 45% who use the CCAP reimbursement rates.

The 2023 Market Price Survey finds that the tuition rate for a typical child in Alaska is $888 per month for full time care. By age, the typical rate for infant care is $1000 per month, typical toddler care is $950 per month, pre-school care is $850 per month, and school-age care is $707 per month. The typical rate at a Licensed Home is $800 per month, and $968 at a Licensed Center.

In addition to basic tuition, common fees include registration (66% of respondents), late pickup (60%), and late payment (53%).

Of the 195 responding providers who offer care to school age children, 65% provide care during planned school closures, 37% provide care during unplanned school closures, and 10% provide care during other types of school closures. During winter and spring break, the majority of school age child care providers have fewer hours than normal (64%).

Small portions of child care providers (17%) provide regular care during the evening hours, daytime care on Saturday and/or Sunday, and regular overnight care.

Of providers who offer reduced rates, 71% offer reduced rates for children of employees and 51% for additional children in the family. Of providers who offer income-based scholarships, most base their decision on a family's income or need (94%) or a family's history with their program (83%). Slightly fewer providers (77%) also consider the level of external funding that their program receives. On average, providers reported providing reduced rates to 7.5% of children (Table 121).

Of the 209 responding child care providers who participate in CCAP, 14.8% reported reducing rates by more than 40% for families not participating in CCAP. Nearly half of child care providers who participate in CCAP (45%) charge parents some or all of the remaining balance after CCAP payments are applied. On average, less than 10% of children were given reduced rates in September 2023.

Methodology

Information for this licensed child care provider market price report was gathered through a survey sent to licensed child care providers from October 3rd to November 28, 2023. Prior to and after the survey start date, CCPO advertised and notified child care providers about the survey. The invitation letter sent the first day of the survey included the online survey link. Reminders were sent weekly to non-respondents. In the final weeks of the survey, two reminder emails were issued per week. Telephone follow-up of non-respondents began two weeks after the start of the survey. A total of 497 valid childcare programs were provided by CCPO. Of these providers, 25 were found to be closed, 13 opted out of the survey, 16 were otherwise unreachable (they had no contact

information, or their email bounced). Therefore, a total of 443 childcare providers received email invitations to complete the survey. A total of 268 surveys were initiated. Of these received initiated, 21 were excluded because the respondent did not answer any questions or did not progress far enough into the survey to answer questions about rates or capacity. Therefore, a total of 247 (55%) surveys qualified for analysis.

In the *Rates at the 75th Percentile* section of the report, rates are weighted by the number of children enrolled in care. All other rates and fees (such as in the *Rates, Care, and Fees* section) are reported as unweighted and unadjusted survey responses.

Limitations

This report presents data analyzed from the 2023 Market Price Survey. Provider Price Tables provide child care providers' price information for the four CCAP age groups - infant, toddler, preschool age, and school age. Very few providers were available in some rate regions. It is recommended the actual number of respondents always be taken into consideration when interpreting the results. Data cleaning lead to some assumptions and standardizations about non-conforming responses. Child care providers noted limitations in the survey questionnaire, including language barriers.

Future Considerations

The impact of the current economic climate was a prominent theme in the response to considerations for the next Market Price Survey, particularly the wages and availability of staff, including the need for the provision of benefits and retirement. Additional themes were increasing the rates and funding, concerns on operational costs, CCAP issues, providing CCAP information and program education in both English and other languages, and provision for survey administration and follow-up calls in languages other than English. The majority of non-English speaking providers requested communication in Spanish. Other languages specifically noted were Hmong, Samoan, and (rare) Arabic.

Introduction

Federal Requirements

The Child Care and Development Fund (CCDF) is the federal grant that provides funding to states to increase the availability, affordability, and quality of child care services. Priority for services is given to children in families with low to moderate incomes and children with special needs. The goals of the CCDF are to:

1. Allow each State maximum flexibility in developing child care programs and policies that best suit the needs of children and parents within that State;
2. Promote parental choice to empower working parents to make their own decisions regarding the child care services that best suits their family's needs;
3. Encourage States to provide consumer education information to help parents make informed choices about child care services and to promote involvement by parents and family members in the development of their children in child care settings;
4. Assist States in delivering high-quality, coordinated early childhood care and education services to maximize parents' options and support parents trying to achieve independence from public assistance;
5. Assist states in improving the overall quality of child care services and programs by implementing the health, safety, licensing, training, and oversight standards established in the federal law and in State law (including State regulations);
6. Improve child care and development of participating children; and
7. Increase the number and percentage of low-income children in high-quality child care settings.

The Family Support Act of 1988 stipulated that state child care assistance rates be driven by market prices. The passage of the Personal Responsibility and Work Opportunity Act (PRWORA) in 1996 required states to survey their child care markets at least every two years. The reauthorization of the Child Care and Development Block Grant Act in November 2014 currently requires states to survey their child care markets at least every three years, and no more than two years prior to submitting their CCDF Plan.

A market price survey collects current child care prices and other information about child care providers across the state. Price information is collected for providers who have an established price for a given category of care, who are part of the priced child care market, and who provide services to the public. The primary purpose of conducting a market price survey is to help ensure that state subsidy rates (state rates) for child care are high enough so that families receiving child care assistance have equal access to affordable child care as families who do not receive child care assistance. States are required by the federal government to set their state rates for providers at the 75th percentile of current market prices, which is designed to give families receiving child care assistance access to 75% of the child care providers in their community.

In accordance with these federal regulations, the Institute of Social and Economic Research under contract with the Child Care Program Office (CCPO) conducted the most recent market price survey from October 3rd to November 28th, 2023. Findings from the 2023 survey are included in this report and will be incorporated into *Alaska's Child Care and Development Fund (CCDF) Plan* to the federal government for Federal Fiscal Year (FFY) 2025-2027. *Alaska's CCDF Plan* will be posted on the CCPO website once it is approved by the Administration for Children & Families, Office of Child Care.

Limitations

This report presents data collected and analyzed from the 2023 Market Price Survey, covering facility capacity, child care enrollment and attendance information, waitlist information, incentives for reduced prices, registration fee information, and the child care provider's business type. ISER researchers utilized assumptions to standardize non-conforming responses. Please look to the methodology section for detail. Definitions of terms and geographic regions are also located in the methodology section.

Provider Price Tables provide child care providers' price information for the four CCAP age groups - infant, toddler, preschool age, and school age. Very few providers were available in some rate regions. It is recommended the actual number of respondents always be taken into consideration when interpreting the results in this section. For instance, a high percentage may be seen in response to a question, but there may have been only one or two providers in that particular rate region. In all tables, percentages have been rounded to the nearest whole number and do not always add up to 100%.

Providers who spoke English as a second language, or who did not speak any English were unable to fill out the survey, and in many cases, were unable to communicate over the phone unless they asked a relative (often a child) to help translate. This hampered survey administration and follow-up calls. The majority of non-English speaking providers requested materials and communication in Spanish. Other languages specifically noted by child care providers were Hmong, and Samoan. During follow-up calls, researchers also noted the use of Arabic as the primary language.

Rates, Care, and Fees

In this section of the report, all rates and fees are reported as unweighted and unadjusted survey responses.

When setting your rates, what information do you use?

Child care providers used a variety of sources when setting their rates. The most frequently used sources are the actual cost of providing care, CCAP reimbursement rates, and neighboring facilities' rates (see Table 1).

Table 1. Information Used for Rate Setting

	Responding providers (n = 247)	
	#	%
CCAP reimbursement rates	112	45.3%
Neighboring facilities' rates	100	40.5%
What I feel/hear that parents can afford	58	23.5%
Actual cost of providing care	127	51.4%
Other	46	18.6%

Respondents were asked to mark all that apply. Percentages are a portion of all responding providers (n = 247) and will not add up to 100%.

How to read the headings in the follow tables

Number of Responding providers:
Only survey respondents (providers) with valid data are included in this number.

Number Receiving (Part Time/Full Time) Care Tuesday September 19th:
Total number of children receiving care on Tuesday, September 19th.

Number Enrolled During September 2023
Total number of children in full month enrollment or part month enrollment in September 2023 as reported by survey respondents.

Percent of Responding Providers (Waitlist Tables)
The percentage of responding providers who reported having a waitlist.

Number who Provided Rate Information (Rate Tables)
The number of providers who provided valid responses for their rates.

Min:
The lowest rate reported by any provider in that Census Area/Borough.

25th Percentile:
The estimated 25th percentile rate for all reporting *providers* calculated for that Census Area/Borough. One out of every four facilities charge less than this amount, while the remaining ¾ of facilities charge more.

50th Percentile (Median):
The estimated 50th percentile or median rate for all reporting *providers* calculated for that Census Area/Borough. Half of facilities charge less than this amount, while the remaining half of facilities charge more.

75th Percentile:
The estimated 75th percentile rate for all reporting *providers* calculated for that Census Area/Borough. Three out of every four facilities charge less than this amount, while the remaining ¼ of facilities charge less.

Max:
The highest rate reported by any provider in that Census Area/Borough.

Summer Break

Child care providers who offered care for school age children were asked if summer break care is offered. Rates reported by providers are shown by percentile. These data are reported as percentiles (including the median) because of the variability in the distribution of survey responses. Reporting an average would mask this variability.

A percentile is a statistical measure; it is a value on a scale of 1 to 100 that indicates whether a distribution is above or below it. In this report, percentile represents the percentage of reported prices that are equal to or below the price shown.

Table 73: Number and percent of School Age Child Care Providers that offer Summer Break Care

Reduced Rates

We look at Alaska child care providers statewide and by facility type[1] to determine why they offer rate reductions or discounts. The most frequent reduction is for children of employees followed by additional children in the family (see Table 85).

Table 90. Providers offer reduced fees for….

(n = 116)

Reason for reduced/discounted rates	Providers offering reduced rates (n = 116) #	%
Auto pay	7	6.0%
Paying early	4	3.4%

Rates at the 75th Percentile

States are required to establish state rates at the 75th percentile of market prices to help provide equal access to child care. A percentile is a statistical measure; it is a value on a scale of 1 to 100 that indicates whether a distribution is above or below it. In this report, percentile represents the percentage of reported prices that are equal to or below the price shown. Before calculating percentiles for each price increment, prices were weighted by the number of children enrolled in care. In this way,

During data collection all types of care were not provided in all places and the response rates are less than 100%. Data is also missing for some *boroughs, facility types and age group* combinations depending upon the completeness of the survey by providers. Non-response leads to data holes.

To fill in the missing data, we used a tiered spatial aggregation method. We used the data as provided by child care providers to determine the 75th percentile for all places, facility types, age groups, and duration of care. We look at the data provided by child care providers and assess:

- **If** sufficient data are not available to calculate a weighted 75th percentile at the level of *borough + facility type + age group + duration of care*
- **Then** Calculate 75th percentile of the *economic region + facility type + age group + duration of care*
- **If** economic region is still not sufficient,
- **Then** Calculate 75th percentile of the *Railbelt v non-Railbelt region + facility type + age group + duration of care*

We define `sufficient' has areas having valid responses from 4 or more providers. When we reach the aggregation of least 4 or more providers using the tiers as described below – the 75th percentile at that aggregated geographic level is selected for that borough, facility type, and age group. Spatial aggregation up to a minimum of 4 child care providers reduces the influence of "1" provider responding for an area and thereby setting the rates for every facility in that region. If an area has only a single provider, this also prevents them from effectively setting their own state rates through their response to the survey.

Aggregating over space recognizes that the nature of child care markets differ across the state based on the cost of living, the local labor market, and other factors. The geographic levels are:

- **Boroughs** are 30 Child Care Assistance Rate Regions based on Boroughs and Census Areas within the state of Alaska
- **Economic regions** are groups of Boroughs with similar economic structures, including labor markets and transportation costs.
- **Railbelt** is a convenience grouping separating the areas of the state, which are integrated via road, rail, and power from those that are not.
- We considered ad-hoc groupings for the highest tier (Railbelt), but ultimately chose an accepted and conventional grouping.

A more detailed description of these geographic areas can be found in Definitions within the Methodology section of this report along with maps.

To clarify the 30 boroughs are the preferred basis we are using for calculation of rate percentiles. However, if there are less than 4 providers in a borough, we used the Alaska economic region grouping. If there are less than 4 provers at the economic region level we used the Railbelt vs non-

Railbelt grouping. For example, in the Sitka City and Borough, assume 4 Licensed Centers who offer full-time care to preschoolers responded to the survey with enrollment and rate information. Because at least four providers in this borough offer this category of care and responded, the enrollment-weighted 75th percentile for these four providers determines the rate for the Sitka City and Borough full-time preschool aged care at Licensed Centers. In contrast, assuming only three responding Licensed Centers in the Sitka City and Borough offer *part-time* care for preschoolers. To obtain a sufficient number of respondents for this category, we look at Sitka's economic region: Southeast. In the Southeast economic region, assume that we have 11 responding Licensed Centers that offer part time care for pre-schools. These include the 3 assumed centers in Sitka, plus 4 in Juneau, and 1 each in Petersburg, Prince of Wales-Hyder, Ketchikan, and Haines. Grouping these centers together provides sufficient data to calculate the enrollment weighted 75th percentile for these 11 providers. This rate determines the rate for Sitka. Finally, for the case of part-time Licensed Home care for preschool children, assume Sitka had only 1 responding provider. The Southeast economic region had only 2 responding providers. As Sitka is not on the Railbelt, we look at all non-Railbelt Licensed Homes providing part-time preschool care, of which we assume there are 4 in this example, meeting our requirement to calculate the enrollment-weighted 75th percentile, which determines the rate for Sitka for this category of care.

Even with this aggregation method, there are some age groups, facility, and regions that do not meet the 4 provider threshold. This occurs when there are few child care providers or more nonresponding providers for the specific location, age group, and provider type.

Following are the tables showing the 75th percentile for full and part month rates. Using the 2021 rate schedule (see Appendices), we inferred day rates are 1/16.5 the monthly rates. Given that the calculation is straightforward, we opted not to show the following set of tables:

Infants - LICENSED CENTER/GROUP HOME - Full Day

How to read the headings in the follow tables

Providers with Prices:
Only survey respondents (providers) with prices and enrolled children are included in this number. Providers are counted once in each category for which they reported children and a price.

Number of Providers:
Number of surveyed providers who reported having children in full month or part month enrollment care in October 2020.

Number of Children:
Number of children in full month enrollment or part month enrollment in September 2023 as reported by survey respondents.

State Rate:
Child Care Assistance rate schedule Updated 2021 (see Appendices).

75th Percentile:
75% of the children are being charged equal to or below this price.

SR – 75 ($): State Rate $ Difference from the Price at the 75th Percentile
Calculated by subtracting the state rate from the price at the 75th percentile. A negative value indicates that the state rate is less than the price at the 75th percentile by that amount, while a positive value indicates that the state rate is more than the price at the 75th percentile by that amount.

The shaded amount shows the level aggregation used to identify the selected 75th percentile rate.

Please note the rates that are in **red text** did not reach the 4 provider minimum we discuss in the spatial aggregation. There were not enough providers for the age group, regions, and provider type that provide care and/or not enough that responded to the survey.

The Copper River and Chugach census areas have been combined into the "Valdez-Cordova" census areas for the rate schedule tables.

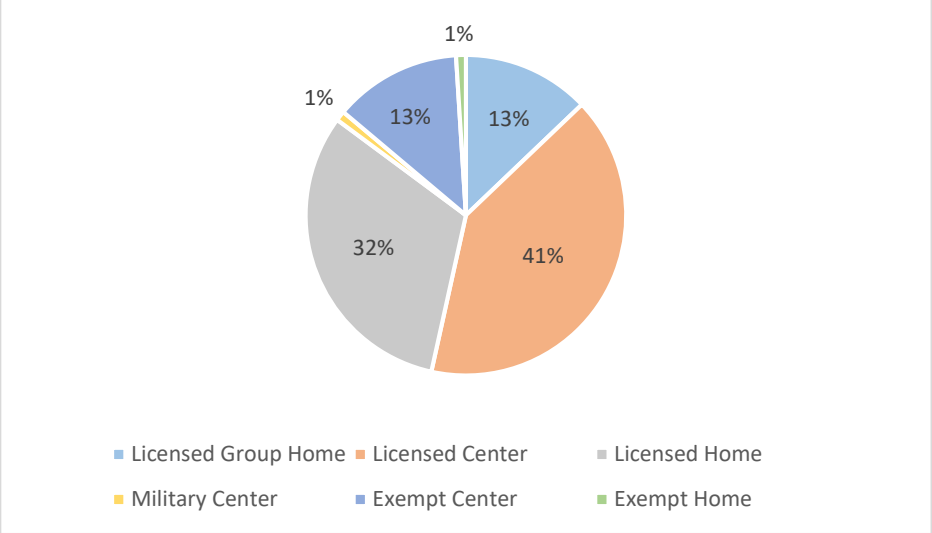
Type of Facility

Most responding child care providers were either Licensed Centers (41%) or Licensed Homes (32%) (see Figure 5). Nearly half (44%) of responding child care providers were Sole Proprietors (see Table 116).

Figure 1. Number and percent of responding providers by facility type



Type of Business

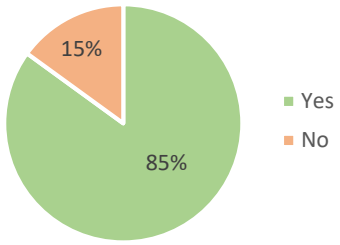
Participation in Child Care Program

Most (85%) child care providers participate in the Child Care Assistance Program (see Figure 6).

Figure 2. Number and percent of current participants in Child Care Assistance Program



Reasons for not participating

For the 15% of child care providers who are not participating in the Child Care Assistance Program (CCAP), we asked what their reasons are. The majority of these providers (75%) indicated other reasons for not participating in CCAP (see Table 117).

Table 119. Reasons for Not Participating in Child Care Assistance Program

(n = 36)

	CCAP non-participant providers (n = 36)	
	#	%
Family eligibility requirements change too often	2	6%
Past difficulty collecting fees from CCAP	1	3%
Reimbursement rates are too low	2	6%
Do not know about the program	3	8%
Do not know how to participate	3	8%
Application process is too long	3	8%
Requirements are too high	0	0%
Other	27	75%
Business closed	1	2.8%
Business chose not to participate	6	16.7%
Economic reasons	2	5.6%
Families do not qualify	10	27.8%
Program does not qualify	7	19.4%
Program is free	2	5.6%

Rate reductions

Approximately one quarter of child care providers (22%) offer income-based scholarships or reduced rates for families who have trouble affording care. Over half of child care providers help families to apply for CCAP (58%) or give families information about other resources, such as THREAD (62%).

Table 120. Ways that Child Care Providers Help Families having Trouble Affording Care

	Child Care Providers	
	#	%
Help to apply for CCAP	144	58%
Information about other resources (e.g. THREAD)	152	62%
Information about lower cost facilities	29	12%
Income-based scholarships or reduced rates	54	22%
Other	50	20%
Answer questions	3	1.2%
Business chose not to participate	1	0.4%
Families are already enrolled in CCAP	2	0.8%
Families do not qualify	2	0.8%
Families receive assistance through other programs	1	0.4%
Language translation	1	0.4%
Materials are needed to educate parents	1	0.4%
Program does not qualify	1	0.4%
Provide CCAP contact information	3	1.2%
Technical assistance	3	1.2%
Total	**247**	**100%**

Of the child care providers who offer income-based scholarships or reduced rates (n = 54), they most often consider a family's income (94%), the family's history with the program (83%), and the level of external funding their program receives (77%) (see Table 119).

Table 121. Considerations for Scholarships or Reduced Rates

	Child Care Providers	
	#	%
Family's income/need	51	94%
Family's history with our program	45	83%
Program's current waitlist	19	35%

Level of external funding that program receives	42	77%
Other	16	30%
Current local economic climate	1	1.9%
Refer to other organizations for assistance	2	3.7%
Total	**54**	**100%**

Of the 209 child care providers who participate in CCAP, 14.8% reported reducing rates by more than 40% for families not participating in CCAP. Nearly half of child care providers who participate in CCAP (45%) charge parents some or all of the remaining balance after CCAP payments are applied (see Table 120). On average, less than 10% of children were given reduced rates in September 2023 (see Table 121).

Table 119. Amount of Rate Reduction Offered to Families Not Participating in CCAP

(n = 209)

	#	%
0-10%	10	4.8%
10-20%	8	3.8%
20-40%	3	1.4%
More than 40%	31	14.8%

Table 120. How Providers Cover the Difference in Rates after CCAP Payment

(n = 209)

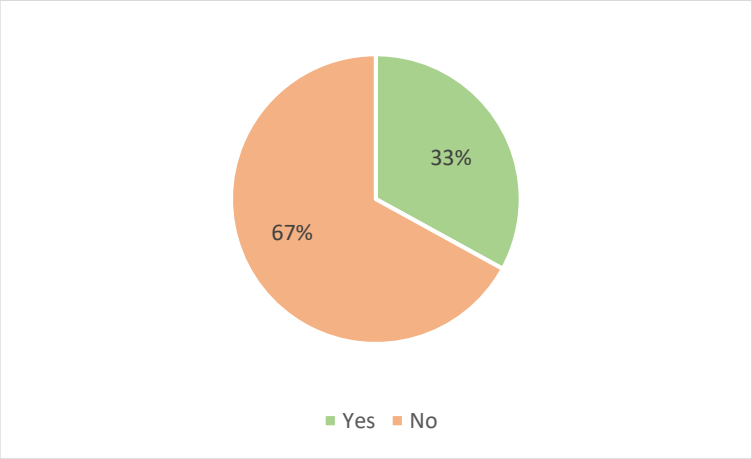
	Child Care Providers			
	# (Only)	% (Only)	# (Any)	% (Any)
Price of care is not greater than what CCAP pays	30	14.4%	39	18.7%
Some or all of the difference is waived	9	4.3%	28	13.4%
Parents are charged some or all of the difference	94	45.0%	146	69.9%
Child receives a scholarship for some or all of the difference	1	0.5%	36	17.2%
External funding (such as grants) covers some or all of the difference	2	1.0%	25	12.0%
Other	5	2.4%	10	4.8%

Table 121. Average Percent of Children with Reduced Rates in September 2023 by Age Group

	Average Percent Reduced
Infants	6.8%
Toddlers	9.0%
Preschoolers	6.8%
School Age	7.5%

Capacity

Figure 3. Respondents Operating at Full Capacity as of September 2023 as Listed on Child Care License



About two-thirds (67%) of responding providers say they are not operating at full capacity (see Figure 8). The lack of qualified child care associates (46.5%) and other qualified child care staff (59.2%) had a substantial impact on providers' ability to operate at full capacity. In addition, 35.7% of providers indicated that not enough families were interested in child care (see Table 120).

Table 122. Reasons for Not Operating at Full Capacity as Listed on Child Care License

	Providers not operating at full capacity (n = 157)	
	#	%
Lack of qualified Child Care Associates	73	46.5%
Lack of qualified Child Development Leaders	50	31.8%
Lack of other qualified child care staff	93	59.2%
Not enough families interested in child care	56	35.7%
Too many other licensed child care providers	9	5.7%
Do not want to operate at full licensed capacity	18	11.5%
Other	36	22.9%
Availability doesn't meet family needs	15	9.6%
Current local economic climate	6	3.8%
Facility specific reasons	4	2.5%
Space and provider ratios	11	7.0%

Narrow Cost Analysis

To understand the cost of providing child care in Alaska, we apply the same approach as the 2017 Alaska Child Care Market Price Survey Report conducted by CCPO to provide consistent estimates of cost over time.

The November 2020 Market Price Survey conducted a second, survey based method to estimate child care costs. However, response rates for questions related to operating costs had low response rates, were sometimes inconsistent, and providers stated concerns about privacy. In order to streamline and reduce the burden of the Market Price Survey on providers, this method was not implemented as part of the 2023 study.

We present the results of a narrow cost analysis conducted using the same methodology as the 2017 and 2020/2021 Alaska Child Care Market Price Survey Reports, with relevant updates to input data. The following text is reproduced with some contextual modification from the 2017 report:

Three key inputs are used to estimate the cost of child care: child-to-caregiver and maximum group size ratios established in licensing regulations, regional wage data from the Bureau of Labor Statistics, and a set of assumptions taken from the "Guidance on Estimating and Reporting the Costs of Child Care" developed by the National Center on Early Childhood Quality Assurance and National Center on Subsidy Innovation and Accountability. More specifically, we used the assumption that personnel costs tend to range between 70% and 80% of total costs for centers.

For Licensed Centers, CCPO used the low end – 70% – of the range. As such, the estimates of total cost that were generated should be on the high end of the range. For Group Homes and Licensed Homes, CCPO assumed the high end – 80% – of the range. CCPO chose the high end of the range because there should be less overhead in Group Homes and Licensed Homes than in Licensed Centers. This should be especially the case for building/facility costs. For Licensed Centers, CCPO used licensing regulations to calculate the total number of children that could be in full time care with two caregivers, along with a half-time caregiver to provide coverage for breaks. For salary, CCPO assumed that caregivers would be compensated in line with the mean wages for Childcare Workers from the Bureau of Labor Statistics for three areas (Anchorage, Fairbanks, and Southeast – nonmetro). In this way, the analysis is limited to the regions defined by the Bureau of Labor Statistics occupational wage and salary data. The latest wage data from the BLS are for May 2023. For mandatory employer contributions, CCPO assumed a contribution of 6.2% for Social Security and 1.45% for Medicare taxes.

After establishing the total amount for wages and mandatory contributions, CCPO calculated personnel costs by multiplying the number of FTEs by the number of hours in the month (160) and then multiplying the product by the hourly wage (including mandatory contributions). To get the total cost to the provider, the personnel costs were divided by the proportion of total costs that personnel costs typically make up (70% as described above). From this total cost, CCPO derived: a) the cost per child (by dividing total cost by number of children), and b) the average hourly admin wages (by subtracting total costs from state total reimbursement and dividing the difference by the number of hours in a month).

This process was repeated for Anchorage, Fairbanks, and Non-metropolitan areas of the state (in other words, all other locations). This process was then repeated for Group Homes and Licensed

Homes. The input parameters for Group Homes and Licensed Homes were identical to the input parameters for centers with two exceptions: 1) the proportion of total costs that personnel costs make up was set to 80% as described above, and 2) the average hourly admin wages above and beyond base wage was calculated for all children in care separately and then summed.

Comparing costs between the findings in the 2020/2021 MPS and the 2023 MPS, costs have increased 9% in Fairbanks, 25% in Non-metropolitan Alaska, and 34% in Anchorage. The cost of care for infants in center-based care increased by and estimated $350 per child in Anchorage, $92 per child in Fairbanks, and $210 in non-metropolitan Alaska. The cost for school age children increased more modestly, by comparison. The estimated cost of school age care in centers increased by and estimated $142 per child in Anchorage, $26 per child in Fairbanks, and $58 in non-metropolitan Alaska.

Thematic Analysis of Open-Ended Questions

The following section is a thematic analysis of the responses to open-ended questions in the survey. Among the responses, there were three overarching themes that emerged due to the subject matter of the open-ended questions. Themes included:

1. CCAP Program
2. Rates
3. Program Operation

Each theme has subcomponents as presented in Table 116. Examples of individual respondent quotes are presented below to convey specific respondent thoughts, needs, and decisions regarding the provision of licensed child care in the State of Alaska. Each quote is presented exactly as written by the respondent. Response codes, such as “business closed,” “families are already enrolled in CCAP program,” and “facility specific responses” that could not be classified by these themes were not included in this analysis.

Table 124: Thematic Analysis Themes and Subcomponents

Theme	Subcomponents
CCAP Program	• Participation • Program Updates • Resources • Training
Rates	• Rate Setting • Rate Adjustments and Fees • Rate Reduction • Making Care Affordable • Scholarship Eligibility
Program Operation & Potential Closure	• Availability and Family Needs • Local Economic Climate • Space and Provider Ratios • Other Care Provided

CCAP Program

Responses in this theme correlated to: participation, or non-participation in the CCA program; suggestions for updates to the CCA program; resources that providers offer to families, as well as resources providers need from CCAP; and suggestions for changes to provider trainings offered by CCPO.

Participation

Child care programs and providers choose not to participate in CCAP for a variety of reasons. Specific reasons respondents cited include:

"Families eligible to receive CCA cannot afford the difference between the State rates and our program's tuition rate."

"My business is still new so I didn't want to add extra paperwork at this time."

"No payment in advance of service- having to work 300 or more hours with a child (6 weeks average) before receiving any pay."

"We have students for less than four hours a day. So we don't qualify for child care assistance programs"

"Do not have any family's that are eligible."

"When we refer parents to other agencies they tell me that we have ccdf to help with our families"

"These sites are fully funded by other grants and funding, We do not currently charge families fees at any of these sites"

Program Updates

Suggestions for CCA program updates included a variety of subjects, such as the need for applications in languages other than English, and improvements to CCAP payment timelines, program and family application process and qualification criteria, and online resources. Specific respondent quotes include:

"Camp Fire runs our Title 1 programs as non-fee based to remove barriers for families. In the past we have run fee based programs at some of these locations, but enrollment numbers dwindled to single digits because parents could not navigate the Child Care Assistance process. English as a second language and time barriers were some of the barriers. When we switched over to completely non-fee based enrollment at one location, enrollment went up 10 fold. The process must be simplified for families with navigation to help families through the process."

"for me if I accept assistance it should be on time payment because this is only my job to sustain my family and all my bills"

"Pre payment by enrollment rate regardless of what the family does. If we work we should be paid."

"The application is so long and intimidating. I know many families who do not apply simply because they don't have time. Also, I encourage CCAP to give assistance to daycare providers who bring their own children to work with them because it would be a huge morale booster for daycare providers to receive free childcare, and it would benefit the center as well. Many other states have already given daycare providers CCAP regardless of their income. For example, I pay $4 an hour for my child to come to work with me, but that is a big portion of my pay. I applied to CCAP but was refused because I made $300 too much per year to qualify. I am the administrator of my center, and I was the sole applicant for my position. Without me, my center would close, and my community would only have one small (and full) center to fall back on. Having to pay for childcare is a big reason I would consider leaving this field, and I know I am not the only daycare worker who feels this way in SE AK."

"increase income limits for families to qualify for CCAP"

"Allow tribes to identify licensing requirements that fit their communities. Create an income scale that reflects cost of living across State."

"A simpler process for families that requires less paperwork and time. Families who need support of CCA do not have the amount of time needed to learn and navigate the system. Many choose not to apply and just not enroll in programs"

"If exempt programs could be eligible, I would love to share the CCAP info with all families, so they could use it at my school"

"also, making it online to fill out for parents and upload documents"

"The current link to the qualifications online leads to a defunct site"

"Fliers & posters & website friendly resources"

Resources

Some child care providers endeavor to assist families with CCAP application, and some providers have suggestions for resources that are needed to assist with program application. Specific quotes include:

"Answer questions the parents have about the program, but the program eligibility is complex and we don't always have all the answers."

"Faxing completed applications to the CCAP"

"Faxing & emailing assistance"

"online training or orientation that takes families through step by step on how to apply, different language options, simple instructions and forms" [Repeated in Training]

"add in versions of these summaries in Spanish, Samoan, etc"

"Translate in Hmong"

"I'd like more for the parents like availability and things to reflect the information once I as a provider tries to introduce the ccap"

"Email address lists and chain of command"

Training

CCAP training for both providers and for parents, including the possibility of hiring a navigator to aid families in the application process were considered important to childcare providers. Specific quotes include:

"online training or orientation that takes families through step by step on how to apply, different language options, simple instructions and forms" [Repeated from Resources]

"offer more trainings in person"

"Staff state that the online training is repetitive, often redundent for those with experience, and outdated."

Rates

Responses in this theme related to: how providers strive to make care affordable for families; factors that are considered when charging fees, and when making rate adjustments or reductions; and elements that influence facility child care rates.

Making Care Affordable

Balancing affordability with the true cost of child care was accomplished in various ways by providers, and included a range of solutions from doing nothing, referring to the CCAP, and providing scholarships and discounts, to work exchange and payment plans for child care. Specific quotes include:

"*Our rates usually match the state rates, however I raise my rates every other year usually to keep up with inflation and employee wage increases. So when my rates are more than the state's rates, the parent is responsible for any additional costs"*

"Some of our parents have access to childcare assistance through Maniilaq"

"Payment plans, usually payments made weekly or in exchange for work done at the facility."

"We tried to have work for payment, i.e. cleaning after hours for payment to childcare overdue balance"

"GIve parents applications for Child Care Assistance"

"We have an scholarship program that our facility funds. Families can apply to recieve a discounted rate of tuition and we have a amount of our budget that is allotted for that each year."

"We partially or totally waive their rate for a period of time"

Rate Adjustments and Fees

Depending on the enrollment contract, some providers increase the child care rate for care outside of school-year hours; however, if the contract is for year-round care, that cost was already factored into the monthly payment, and the rate did not change. Child care providers charge additional fees for various reasons, including toileting/diapering, meals, supplies, transport, activities, NSF and late payment, extended care, and application, registration, waitlist, payment plan, and credit card payment fees. Specific quotes include:

"Some but not all field trips require a fee"

"School Transportation Fee"

"Late fee is $25 for the first min and $5 for additional minutes"

"Diapering fee if you are over the age of 3"

"Credit Card Fee (based on $995) - $35 optional - families can pay with check with no fee"

"late payment is $20 each for first 2 wks then considered 2wk notice. if not paid in full 1 month from due date will be assessed another 40.00 and turned into collections."

"Payment plan Fee"

"Holiday Fee"

"Overtime (anything over 10 hours per day or more than 5 days per week)"

"LUNCH FEE"

"Wait List Fee"

"Annual registration fee"

"Extended care - $12/hour capped at $200 a month"

Rate Reduction

Child care providers offer rate reductions in specific circumstances, such as for military and first responders, employees, and siblings, and as part of an incentive, sliding scale, or scholarship. Specific quotes include:

"Military, veteran, First responder"

"Children of employees - based on contract 0 - 50%"

"employees, 80% for 2nd child. None for 3rd child"

"Second or additional Child Discount"

"5 days paid childcare every 6 months if there is a 2 week notice of vacation or ect."

"families that have been with me 3+ years"

"No reduced rates"

"Scholarship: we offer it to two families who meet the criteria, first come, first served"

"only is the parents loss the work."

"Tuition adjustment based on family needs"

Rate Setting

Child care providers consider a wide variety of issues when setting their child care rates. The majority of these considerations are based on the current local economic climate, with additional considerations of curriculum choice, quality of care, historical and current market rates, and the cost of running the child care facility and program. Specific quotes include:

"Inflation"

"A periodic percentage of increase."

"Cost of being a licensed care facility and a private Montessori School with a Montessori Curriculum"

"The quality of my care and the cost of living"

"enough of a salary to attract and retain teachers"

"Cost of expenses of operations of the facility."

"Government Fee charts and rules"

"Quality of care"

"Rates set by Kindercare"

"Try to keep my rates as low as possible, but able to pay my own bills"

"Started my rates based on the previous owners rates"

"Comparable Private Education"

Program Operation & Potential Closure

The program operation theme encompasses provider responses regarding the logistical elements that affect administration of child care programs. Topics influencing program operation include the contrast between child care program availability and specific family needs, local economic climate considerations, other care that is provided beyond the typical, and building space and provider-to-child ratios.

Availability and Family Needs

Child care providers cited multiple reasons for not operating at their full capacity, including the difference between what child care providers had available, versus what families needed in terms of care. Specific quotes incude:

"WE have specific programs not filling due to age requirements. WE have a large infant.toddler waitlist. And a few part-time preschool spots. Most parents need full time."

"Lost a lot of our registered families to full day care. Most families need full day care, not part day care."

"We are finally fully staffed but having a hard time finding families of the age group we have open. Though we're fully staffed a lot of the staff are out sick, so our lower numbers works out for us.6"

"Most needed childcare is infants that's why if possible the 30 months of 3 limit of our capacity if you can only change into 24 months so I can get all my capacity"

"Too many children under 30 months requiring care"

Local Economic Climate

Child care providers referenced the influence of local economic conditions on how childcare programs are implemented and operated, including operating below capacity. Specific quotes include:

"families cannot afford the true cost of care"

"ASD's preschool programs offer free, all day classes. We cannot compete with free."

"Many families on CCAP cannot afford the difference in our rate and the state rate. State rates need to be higher"

"People not paying their bill, parents not willing to work, very unstable clients. i am suppose to be full December 1st, but one parent was let go from her job.so now she needs another one"

"head start is taking most of the 3-5 year olds because its free"

Potential Closure

All provider answers regarding potential closure that were coded within the thematic analysis referenced the local economic climate as the driving force behind potential closure. Because closure has the potential the affect families across the state, this subset of answers regarding the local economic climate is being highlighted here. Specific quotes include:

"Staffing shortages limiting enrollment, not enough income."

"It will be depending on if we can retain staff. At the current rate of pay we can afford to pay many people cannot live on such a small wage."

"Cost of operation vs compensation. Also I have no insurance and zero retirement"

"Staff salary demands are more than the tuition I can charge parents and continue to have students enrolled"

"I'm going out of funds, no money and about to lose everything. Tried to get funds but no one has given us any funds since march but that did not even hold us up. Last week my electric utility was shut off this month. The cars can't be paid or insurances or any of the rent or utilities to keep the facility so we will most likely have to close our doors due to not enough funds coming to hold us up or even to keep us going in March we got a grant for $30,000 and that was spent in one day trying to catch up rent and stuff allowance and benefits. Also I tried to reach out for more funding and they said I'm sorry that's all for your facility which I was able to prove we were in more need at the time we got dispersed childcare grants since 2020 and I was never accommodated for the facility to be covered completely to operate or to even cover staff operational's up keeping PPE or the mental health benefits for our staff to keep going so if you see any for an seen availability funds to accommodate us before we have to close by November or the middle of November. Please act fast."

We have been unable to run our facility at full capacity because of the staffing shortage. We have had to increase our teachers pay to retain the staff that we do have. Every month we lose about 2 to 3 thousand dollars which is where our CARES stabilization money has been being used. Unfortunately that money is almost gone. We will need to budget very carefully, make cuts to services offered, and raise our tuition rates to remain open as long as we can."

"What we charge does not cover our expenses."

"Cost of running a business' is rising and budgets are struggling to cover rising cost of goods"

"2 of our 4 non fee based sites will likely close in 2024 as we have no ongoing funding for these. The others that do remain open will have to switch over to our fee based model and we will have designated staff to try and assist families with CCA process. These programs staying open will also be directly tied to enrollment and interest in the programs."

"it is very possible that we may have to close some programs or parts of program to evaluate sustainability. We are projecting a 1.5 million dollar deficit to operate all programs in 2024"

"Lack of tier food reimbursement from USDA and food costs. Cost of materials, wear and tear on my home and the increase in all operating expenses. The economy is making it almost impossible to stay open and make an honest living"

"Cannot afford the child care"

Other Care Provided

For school-age children, some providers offer child care that is beyond the before- and after-school care contract for families. This care is sometimes provided on a case-by-case basis, or is offered to children enrolled in the program. Examples include child care when a child is sick, care during summer and holiday breaks, school half-days, suspensions, and in some cases, weather closures. Specific quotes include:

"Too Sick to go to school"

"Any reasons that they are not allowed to go to school? For example, certain illnesses, suspensions kicked out or off buses, etc."

"If the school closes due to weather, we will also, however if the children are sent home early for other reasons we do care for them; we only charge more for holiday breaks vs school rate (PT)"

"only close for emergency, no for weather"

"summer care"

"If the child feels too sick to go to school but the parents has to go to work"

Space and Provider Ratios

Programs may not operate at capacity due to available building space and due to provider-to-child ratio needs; these reasons were cited because of licensing requirements, difficulty hiring and retaining staff, and staffing needs for children who need extra support. Specific quotes include:

"Due to square footage and Licensing ratio - we can only provide care to 86 children this year."

"Can not find enough employees"

"Children require far more support and supervision due to the trauma and stress of the last few years. If we had 12 children we would need at least 4 staff on at all times and it would be pretty crowded in our space."

"We have too many children with special needs and lack the support needed to provide services like OT and PT. Keeping a smaller community is more manageable."

"difficult to find a reliable, dependable workers."

"If we know a child will need extra attention, we limit a class size."

"We do not have space for our school age classroom so it is limiting our numbers for our lower aged group children."

"I have to transport kids to and from school eight children will be to much at this time , during the summer I will raise my capacity"

"I have some children that are special needs and require care as an infant when they are already 30 months old. It hurts my income but I want to be able to help everyone equally therefore I only have 10-11 children most of the time."

"Cost and need more staff to allow over 45 students"

Methodology

Survey Methodology

The survey methodology includes a description of the processes, notification system, and methods used to collect information for purposes of the 2023 Alaska Child Care Survey. This survey is an update based on the 2020 Market Price Survey.

Scope of Survey

The 2023 Market Price Survey consisted of collection of child care market price data. These are:

• Facility and Business type

• Child Care Assistance Participation

• Capacity

• Age Groups - Infancy to School aged Children

• Enrollment and Waitlist

• Rates – full and part -month and day for all age groups; and before, after, and both before and after for school age children

• Additional Fees

• Additional Care

• Reduced rate

Questionnaire Development

The 2023 questionnaire was based on the instrument used for the 2020 Market Price Survey, excluding most questions regarding the Covid-19 pandemic.

Recruitment

The 2023 Alaska Market Price Survey was advertised and promoted by the CCPO via emails, newsletters, and their website. CCPO continued outreach efforts throughout the survey period. CCPO provided research staff with a list of licensed childcare providers in the state of Alaska, and included provider contact information, service area, and region. Using a census approach, a total of 486 licensed child care centers were invited to participate.

Survey Administration

The survey was distributed beginning October 3rd, 2023, and was initially scheduled to remain open for six weeks until November 7th, 2023. However, at the end of the six-weeks, survey administrators and CCAP representatives authorized a two-week survey date extension (November, 21st, 2023) in order to permit childcare providers to complete their surveys and to increase the response rate. The survey remained open until November 28th, 2023 to give allowance for completion of partially-finished surveys. Paper surveys were available to providers upon request.

During survey administration, it became clear that data validation procedures within the online survey were hindering child care provider ability to enter and submit data. The validation was present in some areas of the online questionnaire in order to ensure a digit was entered as an answer instead of text; the survey system would not let the respondent proceed in the survey unless the answer was a digit. However, some child care providers were entering digits along with a space, and the validation would not let providers proceed until the space had been removed. Because this issue had the potential to interfere with the response rate, researchers removed the data validation from the survey in favor of cleaning the data post-response. This allowed all respondents to proceed within the survey without issue. The data validation was removed two weeks after the start of the survey.

Child care providers with more than one child care center location were considered a multi-site provider, and were separated into two categories: small multi-site providers, and large multi-site providers. Small multi-site providers had between two and three locations; large multi-site providers had more than three locations. Small multi-site providers received survey links emailed to them directly from a researcher's email address. Large multi-site providers were contacted via email and phone to request their preferred method: aggregate all sites into one or more surveys based on rate schedule; or, fill out a separate survey for each individual site.

Data Collection

In the first week after deployment of the survey, phone calls were made to providers that did not have an email address on file. A call script was used to ask providers for an updated email address. If a provider did not answer, a voicemail was left detailing the researcher's contact information, survey information, and a request for a return call. For providers that offered an email address, a new distribution was set up through Qualtrics to generate survey links and schedule reminder emails.

Reminder Emails

Reminder emails were distributed once a week beginning one week after survey launch. In the final week of the survey, two reminder emails were issued. When the survey close date was extended, a notification email was sent. On the last day of the survey period extension, a final reminder email was distributed.

Reminder Calls

Follow-up calls began in the third week of survey administration to bolster provider response. A call script was used for calls and voicemails. When needed, to address provider needs, researchers deviated from the script using information about the survey to inform answers to provider questions or to address provider feedback. Call and voicemail scripts can be found in the appendices.

A working pivot table detailing response rates by region was used to refine the follow-up call procedure, allowing researchers to prioritize calls in regions with low response. This table was used while the survey was active and did not reflect data cleaning and final survey response rates.

Table 125: Call Prioritization

Survey Status	Region							Total
	Anchorage	Gulf Coast	Interior	Mat-Su	Northern	Southeast	Southwest	
Complete	109	29	31	18	5	31	3	227
Started – High	8	2	-	-	-	-	-	10
Started – Low	18	4	7	7	-	4	-	40
Not Started	87	15	20	26	-	17	1	166
Opted out	10	2	1	-	-	-	-	13
Closed	8	3	5	5	1	5	-	25
Bounced	6	-	4	1	-	1	-	12
No Email	1	-	1	-	-	-	-	4
Total	248	55	69	57	6	58	4	497

Providers from regions of focus (via pivot tables) that had not opened the survey email were contacted first to ensure that they had access to the survey. Subsequently, providers that had opened the email, but had not yet started the survey were contacted, then, providers that had started the survey, but had not yet finished were contacted. Providers that completed the survey were not contacted or contact was not continued. During survey follow-up, researchers called providers with bounced email addresses to identify an appropriate email address. Bounced email invites with the provider's individual survey link were distributed via the researcher's UAA email address. ISER and the CCPO team collaborated to update child care provider contact information. A call log was used during calls to record pertinent interactions and the result of each phone call. This information was used to inform survey administration as well as future phone calls, and to record child care provider requests regarding the survey. If a provider requested the survey to be sent to a new email address, researchers distributed the provider's individual survey link via the researcher's UAA email address.

Data Cleaning

After the close of the survey period, all duplicate, incomplete, or inconsistent responses were identified and corrected. Initial data cleaning was done on an extracted set of data from Qualtrics. They were then imported into Excel and the Statistical Package for the Social Sciences (SPSS) for further cleaning and analysis.

To ensure calculations and statistical summaries of provider reported rates were accurate and consistent, several definitions, assumptions, and standardizations were applied to the data during cleaning of raw survey response. These key decisions include:

Assumptions:

In general, if a value of zero (0) was entered for financial information or if the number entered was unrealistically large or small, it was recoded as missing if it could not be easily recoded. Specific scenarios are listed below.

- If zero (0) was entered for rates, then it was recoded as missing under assumption $0 means the provider does not provide that care.
    - If provider entered text (e.g., varies, depends on schedule, etc.) for rates, value was recoded as missing.
- If zero (0) was entered for additional fees, it was recoded as missing under the assumption that a $0 fee means the provider does not charge that fee.
- If zero (0) was entered for the number of enrolled children while the number of reduced children was missing (or the opposite), the zero entry was recoded to missing. If a provider listed a number for enrolled children and nothing for the number reduced, zero (0) was entered for the number reduced. If zero (0) was entered for both the number of enrolled children and the number of reduced children, they were recoded as missing.
- If an unrealistically large number was entered for rates, (e.g., a provider entering $1,000 for a daily rate) it was recoded as missing unless it was clear that the provider mistakenly entered an extra zero (0) to the end of their rate. This was determined by checking the other rates that the provider entered.
    - In very few cases, it appeared that the provider switched their enrollment numbers with their rates. In these cases, the numbers were cross-referenced to their licensed capacity rates to confirm.

- Similarly, if a number of enrolled children exceeded the providers licensed capacity and no other mistake appeared to have been made, it was recoded as missing.

Standardizations:

- When providers gave an age in months for their age definitions, then we would convert the age to years (e.g., 18 months/12 = 1.5 years).
- If a provider gave a range for their rates (e.g., $300 - $500), then we would take an average of the range ((300+500)/2 = $400).

All additional fees were standardized to daily rates. There was great variability in responses and how providers charge additional fees, so several methods were applied and all calculations/imputations were rounded up in order to capture the upper bound to represents the most cases.

Response Rates

Of the 433 licensed child care providers surveyed, 247 (55.8%) responded. Response rates for Licensed Centers, Licensed Homes, and Licensed Group Homes were consistent. The highest response rates were in the Northern and Southwest regions (100% and 75%, respectively), and the lowest response rates were from the Mat-Su and Interior regions (41.2% and 56.9%, respectively).

General Definitions/Descriptions

Child Care Program Office (CCPO):
The CCPO operates within the Alaska Department of Health and Social Services, Division of Public Assistance. Based in Anchorage with regional licensing offices in Fairbanks and Juneau, the CCPO Care Assistance, Child Care Licensing, Alaska Inclusive Child Care (Alaska IN!) and Child Care Grant Programs in addition to statewide Child Care Resource and Referral Network.

Child Care Time Period:
Child care providers were asked for their definitions of part and full, month and day enrollment. Their responses were both in text and numeric values. ISER researchers reviewed them and saw a preponderance of responses consistent with these definitions. The provider rates are also consistent with these definitions. Length of time used for rates of child care are by the following periods:

- **Full month:** 30 days
- **Part month:** 15 days
- **Full day:** 8 hours
- **Part day**: 5.2 hours

Age Groups:
State subsidy rates for Child Care Assistance are differentiated by the following four child age groups:

- **Infant:** Birth through 12 months
- **Toddler:** 13 months through 35 months
- **Preschool Age:** 36 months through 59 months
- **School Age:** 5 years through 12 years

Rate Regions Analyzed in 2023 Market Price Survey:

Census and Borough: Boroughs/Census Areas are the 19 boroughs and 11 US Census Bureau-defined census areas. These two systems have been aggregated into 29 geographic units which correspond to 2015 census area definitions.

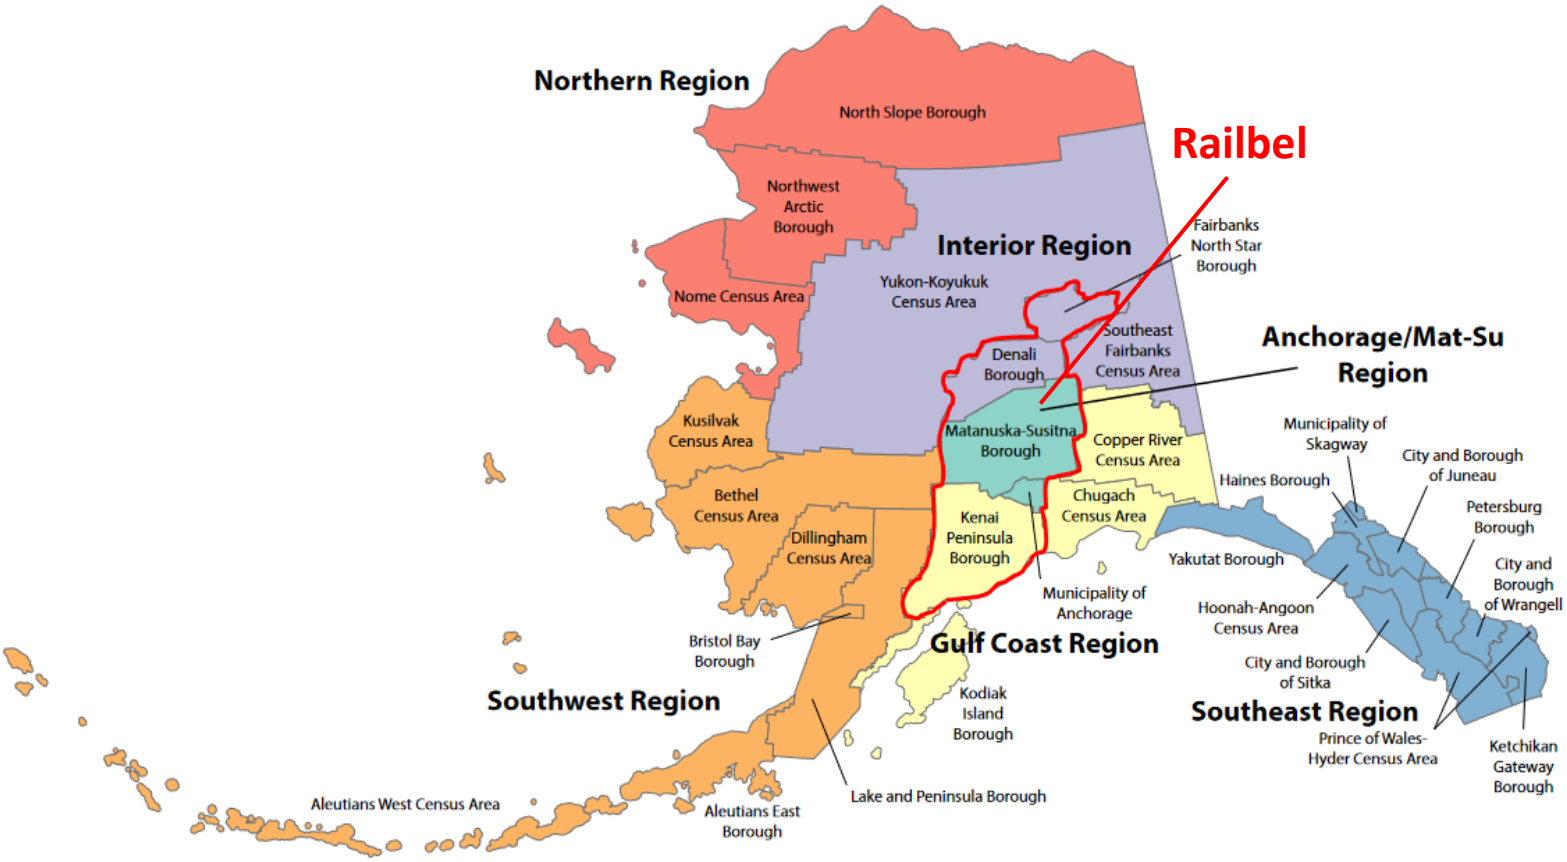
- Aleutians East Borough
- Aleutians West Census Area
- Anchorage Municipality
- Bethel Census Area
- Bristol Bay Borough
- Denali Borough
- Dillingham Census Area
- Fairbanks North Star Borough
- Haines Borough
- Hoonah-Angoon Census Area
- Juneau City and Borough
- Kenai Peninsula Borough
- Ketchikan Gateway Borough
- Kodiak Island Borough
- Kusilvak Census Area
- Lake and Peninsula Borough
- Matanuska-Susitna Borough
- Nome Census Area
- North Slope Borough
- Northwest Arctic Borough
- Petersburg Borough
- Prince of Wales-Hyder Census Area
- Sitka City and Borough
- Skagway Municipality
- Southeast Fairbanks Census Area
- Valdez-Cordova Census Area
- Wrangell City and Borough
- Yakutat Borough
- Yukon-Koyukuk Census Area

Alaska Economic Regions: Alaska Economic Regions are based on the 2013 borough and census area geography. Boundaries are determined by the Alaska Department of Labor and Workforce Development:

- Anchorage and Mat-Su
- Gulf Coast
- Interior
- Northern
- Southeast
- Southwest

Rail belt and Non Rail belt: Rail belt is a convenience grouping separating the areas of the state that are integrated via road, rail, and power from those that are not.

- Rail belt
- Non Rail belt



Appendices

Appendix Materials are available upon request. These include:

A1: Proposed 2021 Rates derived from 2020/2021 MPS

A2: Proposed 2023/2024 Rates derived from 2023 MPS

A3: Invitation Letter Sent to Single-Site Providers

A4: Invitation Letter Sent to Smaller Multi-Site Providers

A5: Invitation Letter Sent to Larger Multi-Site Providers
